

A close-up photograph of a fossil specimen, likely a trilobite, embedded in a greyish rock matrix. The fossil shows a central, somewhat circular head shield with a small, dark, circular opening in the center. To the left of the head shield, a hand holds a small white card with the number '114' printed on it. The rock matrix is dark grey with some lighter, orange-brown staining. The fossil itself is a light grey color, contrasting with the darker rock.
